## SAMSUNG HVAC

DVM S2 is the latest generation of Samsung VRF systems, boasting industry leading efficiencies and low ambient heating performance. Artificial Intelligence for refrigerant monitoring and minimal de-frost time are industry firsts. DVM S2 systems are available in Heat Pump and Heat Recovery up to 40-Tons, with up to 20-Tons in a single module.

## TEMPMASTER

TempMaster provides the full range of packaged rooftop units (RTUs) from 3 to 150 tons. All units are manufactured in JCI's Norman, Oklahoma state-of-the-art facility. Currently, NSC APG stocks these units up to 15 tons in St Louis (also in new Lenexa facility starting May 1st) for quick replacement opportunities.

## SAMSUNG DVM CHILLER

Samsung's innovative VRF chiller provides a chilled water solution combined with the benefits of VRF technology: high energy efficiency, compact size and greatly reduced noise output. This modular chiller system is available in 15 ton and 20 ton units with an overall capacity of 240 tons.

## ADDISON DEDICATED OUTDOOR AIR SPECIALISTS

A leader in dedicated outside air solutions (DOAS), Addison delivers best in class solutions up to 140 tons for safer, healthier, and more productive indoor environments. Addison DOAS equipment can come in both rooftop and modular splits system designs.

## MOJAVE

Installing and operating like traditional equipment, Mojave Air DOAS equipment provides energy savings of 40-60% through the use of a liquid desiccant system. Mojave Air DOAS units offer dew points down to 35°F in the middle tonnage range of 20-60 tons.

## CAPTIVEAIR PARAGON DEDICATED OUTDOOR AIR SYSTEM

The CaptiveAir Paragon DOAS system is built on 45 years of HVAC experience. These units offer exceptional energy savings and precise humidity control at an attractive first cost. The Paragon truly shines in the low to midrange CFM applications of 6 to 50 tons.

## UNITED CoolAir All-Indoor Solutions

United CoolAir has been providing indoor and ventilation HVAC products since 1988. Their unique AlphaAire packaged DOAS system is mounted indoors, Vertical or Horizontal. Ready to ship in 2 weeks, with no line sets, no field brazing, evacuating, or charging.

## Swegon

Swegon's flagship GOLD ERV is a complete air handling unit with a Total Energy Rotary Heat Exchanger and optional DX, Water, or Steam Coils. State of the art controls, patented wheel technology, and variable speed control of the wheel and direct-driven supply and extract fans produce dry bulb efficiencies up to 85% in airflows from 300-17,500 CFM.

## RenewAir Energy Recovery Ventilation

First to provide fixed core heat exchange to the North American market, Renewaire is continuing to honor its commitment to quality and reliability 40+ years later. Renewaire shines in the low to medium airflow fixed plate ERV and DOAS market up to 4,250 CFM due to their efficient and space-saving cabinet design.

## BOSCH COMMERCIAL FHP

The Bosch water source heat pump (aka Florida Heat Pump) is a full line of high-quality commercial equipment for common water loop and geothermal applications. They are an ideal choice for all size projects due to their ability to fit in tight retrofit spaces and their capacity of 1/2 to 60 tons.

## BAIKAL

Baikal custom Air Handling Units boast ECM Fan Arrays and high quality construction that provides an efficient, quiet operation. A Modular design with Powder-Coated Aluminum Panels produces a lightweight, versatile, and durable construction that makes for easy transportation and installation on the job site. Offered in airflows ranging from 500-50,000 CFM.

## BOSCH

BOSCH Boilers are designed to deliver the highest quality, flexibility, and dependability in the industry. They offer a small footprint with Stand-alone capacities up to 1MMBTU. Modular systems can be cascaded up to an 8MMBTU system with 40:1 turn-down.
