SAMSUNG HVAC

DVM S2 is the latest generation of Samsung VRF systems, boasting industry leading efficiencies and low ambient heating performance. Artificial Intelligence for refrigerant monitoring and minimal de-frost time are industry firsts. DVM S2 systems are available in Heat Pump/Heat Recovery, single/three phase up to 40-Tons, with up to 20-Tons in a single module.

SAMSUNG DVM CHILLER

Samsung's innovative DVM Heat Pump Chiller provides a chilled water solution that combined with the benefits of VRF technology: High Efficiency, Compact Size, Significant Turn-Down Capability, and reduced noise output. This Modular system is available in 10-Ton and 15-Ton modules, combinable up to a 240-Ton system.

Swegon

Swegon provides state of the art high efficiency equipment to meet the evolving demands of green technology. Through a centralized SMART Link+ control system, Swegon can Monitor their flagship Gold semi-custom air handlers and Bluebox heat pump chillers. Swegon also offers a wide variety of air distribution and chilled beam equipment.

RenewAire

Energy Recovery Ventilation

First to provide fixed core heat exchange to the North American market, Renewaire is continuing to honor its commitment to quality and reliability 40+ years later. Renewaire shines in the low to medium airflow fixed plate ERV and DOAS market up to 4,250 CFM due to their efficient and space-saving cabinet design.

ADDISON

DEDICATED OUTDOOR AIR SPECIALISTS

Leader in dedicated outside air solutions (DOAS), Addison delivers best in class solutions up to 140 tons. Addison DOAS equipment can come in both packaged and Modular split system designs with options for low ambient cooling for data center applications.

addison-hvac.com

MOJAVE

Installing and operating like traditional equipment, Mojave Air DOAS equipment provides energy savings of 40-60% through the use of a liquid desiccant system. Mojave Air DOAS units offer dew points down to 35°F in the middle tonnage range of 20-60 tons.

CAPTIVEAIRE PARAGON

DEDICATED OUTDOOR AIR SYSTEM

The CaptiveAir Paragon DOAS system is built on 45 years of HVAC experience. These units offer exceptional energy savings and precise humidity control at an attractive first cost. The Paragon truly shines in the low to midrange CFM applications of 3 to 60 tons.
